## SABIC GRADE CARD

As of January 1<sup>st</sup> 2004 all products in our integrated assortment will be marketed under the SABIC® trademark. Updated Material Safety Data Sheets, product datasheets and standard product declarations will then also be available on our website ([www.sabic-europe.com](http://www.sabic-europe.com)).

For all other declarations please contact your local SABIC sales office. We kindly ask you to inform your customers about these changes whenever necessary.

Stamylan LL	0318HN00	→	SABIC® LLDPE	6318B

The Stamylan LL grades have been aligned to the SABIC LLDPE grades for all characteristic properties as melt flow rate, density as well as slip and anti-block. By doing so comparable product functionality and performance are ensured despite the different country of origin. Documents and declarations that mention the old LLDPE brand name and grade code will expire per 1<sup>st</sup> January 2004.

Stamylan LD grades formulated with oleamide slip agent will be available as of January 1<sup>st</sup> 2004 as SABIC® LDPE with erucamide. The erucamide slip level secures an equal COF performance as it was based on oleamide. The grade codes for these products have been adapted properly to the SABIC® LDPE coding method.

As of January 1<sup>st</sup> 2004 the production of some Vestolen A injection moulding grades will be discontinued. The production of Vestolen A 6016, 6016 LO, 6014 LO and 5515 will be transferred from the slurry vessel reactors to our gas phase plant in Gelsenkirchen. Our slurry loop plants in Geleen will take over injection moulding grades Vestolen A 5017 and 6013. The product specifications and additive formulations of all successors are identical to the old Vestolen A grades and allow for similar market approvals. Vestolen A 6012 will be phased out and we will assist customers to find a suitable alternative.

## SABIC GRADE CARD

As of January 1<sup>st</sup> 2004 all products in our integrated assortment will be marketed under the SABIC® trademark. Updated Material Safety Data Sheets, product datasheets and standard product declarations will then also be available on our website ([www.sabic-europe.com](http://www.sabic-europe.com)). For all other declarations please contact your local SABIC sales office. We kindly ask you to inform your customers about these changes whenever necessary.
